

PREFOR

ZerO2Nature PREFOR project activities, aim to reduce and/or remove negative emissions through afforestation, reforestation, land use change and/or monitored forest integrity preservation.

The monitored preservation of forests engages the indigenous inhabitants that otherwise would have to guarantee their subsistence by working with legal or illegal logging activities .

In time, ZerO2Nature hopes that forests are proven more valuable for all, as a living system instead of dead organic matter .

Project: Projeto Pontarolo - PREFOR

Project Proponent: Frederico Pontarolo

Methodology: ZerO2Nature Negative Emission Reduction Project Development Methodology Through Afforestation, Reforestation, Land Use Change and/or Monitored Preservation of Forests – Zero2Nature - PREFOR - ZNP0001

PDD: http://www.igeacert.com/PDD/PDD_003ZTN_PREFOR_ver_2_Eng.pdf

Credits per year: 32,223

Validation date: February 6, 2015

Registration date: March 27, 2015

Verification date: April 20, 2015

Certification date: May 4, 2015

Issuance date: May 5, 2015

Total issued O2NCs: 96,669

These credits are mainly directed at companies interested in mitigating GHG emissions.

The main objective of the Projeto Pontarolo PREFOR project is the monitored preservation of 6,262.60 ha. of Amazon rainforest area .
